

# Proceedings of the Indian Academy of Sciences

Vol. 89, January-December 1980

## CONTENTS (Mathematical Sciences)

Criteria for the unitarizability of some highest weight modules	<i>R Parthasarathy</i>	1
Nonnegative integral solution of linear equations	<i>S K Sen</i>	25
On duality in linear fractional programming	<i>C R Seshan</i>	35
On generalised thermoelastic wave propagation	<i>D S Chandrasekharaiah</i>	43
On weak discontinuities through thermally conducting and dissociating gases	<i>Rama Shankar and Sunil Kumar Jain</i>	53
On the breakdown of acceleration waves in dissociating gas flows	<i>Rishi Ram, Bishun Deo Pandey and A S Rai</i>	61
Numerical solution of a quasilinear parabolic problem	<i>P C Jain and M K Kadalbajoo</i>	67
A cryptographic system based on finite field transforms	<i>E V Krishnamurthy and Vijaya Ramachandran</i>	75
Measurability of inverses of random operators and existence theorems	<i>Mohan Joshi</i>	95
On Sharma-Swarup algorithm for time minimising transportation problems	<i>C R Seshan and V G Tikekar</i>	101
MHD Couette flow of a viscous stratified fluid of large conductivity	<i>K N Venkatasiva Murthy</i>	103
Forced convection over a semi-infinite flat plate	<i>N K Banthiya and Noor Afzal</i>	113
On unsteady dispersion flow in porous media	<i>Mohd. A A Ansari</i>	125

Ramanujan and the congruence properties of partitions	<i>K G Ramanathan</i>	133
Diffraction of impulsive elastic waves by a fluid cylinder	<i>B K Rajhans and S K Mishra</i>	159
Numerical solutions of the improved Boussinesq equations	<i>Labib Iskandar and Padam C Jain</i>	171
Propagation of discontinuities along bicharacteristics in the unsteady flow of a relaxing gas	<i>V D Sharma and Radhe Shyam</i>	183

SUBJECT INDEX (Mathematical Sciences)

- Acceleration waves
  - On the breakdown of acceleration waves in dissociating gas flows 61
- Adsorption
  - On unsteady dispersion flow in porous media 125
- All-integer programming
  - Nonnegative integral solution of linear equations 25
- Artificial basis technique
  - Nonnegative integral solution of linear equations 25
- Basic cells
  - On Sharma–Swarup algorithm for time minimising transportation problems 101
- Bicharacteristic curve
  - Propagation of discontinuities along bi-characteristics in the unsteady flow of a relaxing gas 183
- Boundary layer
  - Forced convection over a semi-infinite flat plate 113
- Boussinesq equation
  - Numerical solutions of the improved Boussinesq equation 171
- Breakdown
  - On the breakdown of acceleration waves in dissociating gas flows 61
- Ciphers
  - A cryptographic system based on finite field transforms 75
- Computer data protection
  - A cryptographic system based on finite field transforms 75
- Congruence properties
  - Ramanujan and the congruence properties of partitions 133
- Converging waves
  - Propagation of discontinuities along bi-characteristics in the unsteady flow of a relaxing gas 183
- Cryptography
  - A cryptographic system based on finite field transforms 75
- Diffraction
  - Diffraction of impulsive elastic waves by a fluid cylinder 159
- Dispersion
  - On unsteady dispersion flow in porous media 125
- Dissociating gases
  - On weak discontinuities through thermally conducting and dissociating gases 53
- Diverging waves
  - Propagation of discontinuities along bi-characteristics in the unsteady flow of a relaxing gas 183
- Dual integral transformation
  - Diffraction of impulsive elastic waves by a fluid cylinder 159
- Duality
  - On duality in linear fractional programming 35
- Elastic waves
  - Diffraction of impulsive elastic waves by a fluid cylinder 159
- Existence theorems
  - Measurability of inverses of random operators and existence theorems 95
- Finite field transforms
  - A cryptographic system based on finite field transforms 75
- Formal Dirac operator
  - Criteria for the unitarizability of some highest weight modules 1
- Generalised thermoelasticity
  - On generalised thermoelastic wave propagation 43
- Gomory method of integer forms
  - Nonnegative integral solution of linear equations 25
- Hammerstein operator
  - Measurability of inverses of random operators and existence theorems 95
- Heat transfer
  - Forced convection over a semi-infinite flat plate 113
- Highest weight module
  - Criteria for unitarizability of some highest weight modules 1
- Infinitesimal character
  - Criteria for the unitarizability of some highest weight modules 1

- Injection
  - MHD Couette flow of a viscous stratified fluid of large conductivity 103
- Irreducible polynomials
  - A cryptographic system based on finite field transforms 75
- Keller's geometric theory
  - Diffraction of impulsive elastic waves by a fluid cylinder 159
- Linear fractional programming
  - On duality in linear fractional programming 35
- Linear programming
  - Nonnegative integral solution of linear equations 25
- Load capacity
  - MHD Couette flow of a viscous stratified fluid of large conductivity 103
- Military communication
  - A cryptographic system based on finite field transforms 75
- Monotone operator
  - Measurability of inverses of random operators and existence theorems 95
- Nonbasic cells
  - On Sharma-Swarup algorithm for time minimising transportation problems 101
- Noncompact roots
  - Criteria for the unitarizability of some highest weight modules 1
- Nonlinear
  - On the breakdown of acceleration waves in dissociating gas flows 61
- Nonlinear equation
  - Numerical solutions of the improved Boussinesq equation 171
- Nonnegative integral solution
  - Nonnegative integral solution of linear equations 25
- Numerical method
  - Numerical solution of a quasilinear parabolic problem 67
- Numerical solution
  - Numerical solutions of the improved Boussinesq equation 171
- Parabolic equation
  - Numerical solution of a quasilinear parabolic problem 67
- Parabolic subalgebra
  - Criteria for the unitarizability of some highest weight modules 1
- Partition function
  - Ramanujan and the congruence properties of partitions 133
- Polynomial congruences
  - A cryptographic system based on finite field transforms 75
- Porous media
  - On unsteady dispersion flow in porous media 125
- Prime congruences
  - A cryptographic system based on finite field transforms 75
- Public crypto-systems
  - A cryptographic system based on finite field transforms 75
- Pulse propagation mode
  - Diffraction of impulsive elastic waves by a fluid cylinder 159
- Ramanujan's work
  - Ramanujan and the congruence properties of partitions 133
- Relaxation time
  - On generalised thermoelastic wave propagation 43
- Seepage
  - On unsteady dispersion flow in porous media 125
- Separable random operator
  - Measurability of inverses of random operators and existence theorems 95
- Shock waves
  - On weak discontinuities through thermally conducting and dissociating gases 53
  - On the breakdown of acceleration waves in dissociating gas flows 61
- Singular surface
  - On weak discontinuities through thermally conducting and dissociating gases 53
- Spin module
  - Criteria for the unitarizability of some highest weight modules 1
- Stratification
  - MHD Couette flow of a viscous stratified fluid of large conductivity 103
- Strong equilibrium
  - Propagation of discontinuities along bi-characteristics in the unsteady flow of a relaxing gas 183
- Suction
  - MHD Couette flow of a viscous stratified fluid of large conductivity 103
- Thermally conducting
  - On weak discontinuities through thermally conducting and dissociating gases 53

- Time minimising transportation problem  
 On Sharma-Swarup algorithm for time minimising transportation problems 101
- Wave motion  
 On generalised thermoelastic wave propagation 43
- Weak discontinuity  
 On the breakdown of acceleration waves in dissociating gas flows 61  
 Propagation of discontinuities along bi-characteristics in the unsteady flow of a relaxing gas 183
- Weak equilibrium  
 Propagation of discontinuities along bi-characteristics in the unsteady flow of a relaxing gas 183
- Weak wave  
 Propagation of discontinuities along bi-characteristics in the unsteady flow of a relaxing gas 183
